

Dear Sir/Madam:

I am writing to recommend Alex Goretoy. As a Web Technical Lead, I had the privilege of working with Alex for more than one year at MC Management, Inc. Serving in this capacity allowed me to work very closely with Alex, so I fully understand his capabilities.

Alex's extensive experience with various technologies proved to be very helpful in our environment. Although our shop is primarily an older version of NodeJS Express with MongoDB, we have several platforms that need to be supported simultaneously requiring both noSQL and relational database skills (MS SQL and AS400), knowledge of short-hand version of Javascript called CoffeeScript, as well as knowledge of AngularJS with ES6. Alex demonstrated incredible adaptability and a "can-do" attitude, no matter what the mix of technology for any given assignment. His wealth of experience with other scripting languages such as PHP, Python, and various popular frameworks allowed him to be extremely knowledgeable and flexible when it came to tackling assignments.

Alex also provided many helpful suggestions and solutions to the environment so that we could become more effective and efficient in our day-to-day DevOps tasks using Jenkins and AWS. He provided helpful testing approaches, tools, and suggestions on how we could do things better. He tackled critical and complex assignments involving Redis and SimpleCache with professionalism and much success.

Overall, I would highly recommend Alex and believe he would be a great addition to any team. If you have any questions, please feel free to contact me at the number below.

Thank you.

Best Regards,
Theresa Temple
Web Technical Lead
